Experience

Banbreach, *Software Engineering Intern* 04/2020 – present

- Added multiple in-demand features to an existing video conferencing solution based on Meteor and React which led to increased adoption among local teachers
- Setup and managed Linux servers to configure and host a web based teaching tool based on Docker which allowed Computer Science teachers to access a light Linux system to showcase programs
- Created multiple SEO friendly Nuxt.js websites to showcase various products
- Helped in the on-boarding of a new employee, and got them up to date with the current projects

Projects

India COVID-19 Map, *JavaScript & LeafletJS* 04/2020

- Created a map depicting the spread of COVID-19 throughout most districts and states of India using LeafletJS and GeoJSON
- Gathered data from multiple APIs and aggregated them to feed it into the app

TicTacToe, *Python & Pygame* 03/2020

- Used the Pygame library to build a simple TicTacToe game in a day
